Summary

Data Analyst with **1.5+ years of experience** in **Power BI, SQL, ETL/ELT, and Data Warehousing**. Skilled in Advanced **DAX, Power Query, Dimensional Modeling, OLTP/OLAP, and Reporting Automation**, with hands-on experience developing **interactive dashboards, semantic models, and KPI reporting solutions**.

Technical Skills

BI & Visualization: Power BI Desktop & Service, Tableau, Lumenore, Advanced Excel, KPI Reporting, MIS Reporting, Reporting Automation, Dashboard Development, Operational Reporting, Storytelling.

Data Engineering: ETL, ELT, Data Pipeline Development, Data Integration, Data Transformation, Incremental Loading, Change Data Capture (CDC), Source-to-Target Mapping, Data Validation, Data Quality, Data Lineage, Data Governance.

Data Modeling & Warehousing: Semantic Model Design, Dimensional Modeling, Star Schema, Snowflake Schema, Fact & Dimension Tables, Model Relationships, Cardinality, Date Tables, Fiscal Calendar, Slowly Changing Dimensions (SCD), OLTP, OLAP, Data Warehouse, Data Mart, Data Lake, Data Lakehouse,

Excel (Pivot Tables, Power Pivot, VLOOKUP, XLOOKUP INDEX-MATCH etc.),

DAX (DAX Measures, Filter Context, Dynamic Measures, Dynamic Top N / Bottom N, Calculation Groups, Field Parameters, DAX Query Optimization etc.),

SQL (SQL Server, CTEs, Window Functions, Keys, Complex Joins, Subqueries, Stored Procedures, Views, Query Optimization, Query Execution Plans, Indexing, Performance Tuning, Partitioning etc.).

Performance, Connectivity & Security: Import Mode, DirectQuery, Live Connection, Incremental Refresh, Scheduled Refresh, Data Gateway, Power BI Performance Optimization, DAX Query Optimization, Row-Level Security (RLS), Object-Level Security (OLS).

Tools & Cloud: AWS, Deaver, VS Code, MS SQL Server, Jupyter, BigQuery, DBT, MS Office 365.

Experience

InKnowTech Pvt. Ltd. | Noida, U.P

Data Analyst ***May 2026 – Present***

- Designed and developed interactive **Power BI dashboards**, **Excel dashboards**, **KPI scorecards**, and **operational monitoring reports** to track business performance, alert volumes, and key performance indicators across multiple Business Units.
- Automated **daily**, **weekly**, and **monthly MIS reporting** processes using **SQL** and Advanced **Excel**, improving reporting efficiency and delivering timely insights to Business Heads and Director-level stakeholders Built interactive Power BI dashboards to streamline daily **data extraction** and **reporting.**
- Wrote and optimized **SQL queries involving joins, aggregations, filtering, conditional logic, and data validation** to support analytical reporting and stakeholder-driven data requirements.
- Prepared **management presentations** and **PowerPoint reports** consolidating performance across Business Units, highlighting alert trends, growth and decline patterns, key insights, and actionable observations.
- Prepared customized datasets, SQL-based reports, and analytical outputs based on **ad-hoc stakeholder requests, business requirements, and evolving reporting needs**.
- Collaborated with business stakeholders to gather requirements, define KPIs, validate data, and deliver **Business Intelligence** and **decision-support solutions** aligned with business objectives.
- Translated complex datasets into **actionable insights** and **data-driven recommendations** to support management decision-making and operational improvement.

Netlink Software Group America Inc. | Bhopal, M.P

Data Analyst ***Aug 2025 – May 2026***

- Designed and developed end-to-end **Business Intelligence solutions** and **interactive dashboards** using **Power BI** and **Lumenore**, translating business requirements into KPI-driven analytical and operational reporting.
- Developed and optimized **complex SQL queries, Stored Procedures, Views, CTEs, Window Functions, Joins,** and **Subqueries** for data extraction, transformation, validation, and reporting.
- Improved SQL query execution performance by **30%** through **query optimization, execution plan analysis, indexing strategies, and SQL performance tuning**.
- Designed scalable **Power BI Semantic Models** using **Dimensional Data Modeling, Star Schema, Snowflake Schema, Fact Tables, Dimension Tables, relationships, and cardinality optimization**.
- Built and integrated analytical data models involving **20+ tables**, ensuring efficient fact-dimension relationships, data consistency, and optimized reporting performance.
- Worked with **Import Mode** and **DirectQuery** selecting appropriate connectivity modes based on data volume, refresh requirements, and report performance.
- Configured **Incremental Refresh, Scheduled Refresh, and data refresh strategies** to efficiently manage large datasets and improve Power BI dataset refresh performance.
- Implemented **Row-Level Security (RLS)** and role-based access controls in Power BI and Lumenore to ensure secure and controlled access to sensitive business data.
- Worked across **ETL/ELT processes**, including data extraction, transformation, data integration, Source-to-Target Mapping, Data Cleansing, Data Validation**.**
- Worked with **Data Warehouse and BI Architecture concepts**, including **OLTP, OLAP, Data Warehouse, Data Lakehouse** to

understand and support analytical data processing.
- Collaborated with stakeholders to gather requirements and define **KPIs.**
- Worked on **8+ Technical Proof of Concepts (POCs)** by understanding business requirements and delivering suitable data solutions.
- Worked with cross-functional teams to understand **business requirements, reporting requirements, KPIs, and analytical needs**.
- Supported senior team members in developing and delivering **Business Intelligence, analytical reporting, and data-driven solutions**.
- Supported the development of interactive **Power BI and Lumenore dashboards** for KPI monitoring, operational reporting, business analysis, and data visualization.

Education

Sagar Institute of Science Technology and Research, Bhopal, M.P ***Jun 2021 – Apr 2025***
Bachelor of Technology (B. Tech) - Computer Science Engineering
Scored: 8.10/10 CGPA

Projects

Government Revenue Analytics

- Developed analytical dashboards to monitor municipal revenue streams and identify collection inefficiencies across Property and Water taxation systems.
- Automated ELT pipelines and developed fact/dimension models.
- Performed exploratory data analysis (EDA) to uncover trends, anomalies, and seasonality patterns in revenue and Compliance data.
- Developed KPI-driven analytical reports supporting Revenue Analysis, Compliance Monitoring, Operational Performance Analytics, and Decision Support.

E-Gaming Analytics

- Built BI dashboards (Social Media, Viewership, Web/App, PR) to track KPIs like reach, engagement, impressions, and watch time across regions.
- Analyzed multi-source data (social, streaming, web/app) to derive insights on audience behavior, regional performance, and temporal trends.
- Delivered actionable insights on media value, platform performance, and country-level metrics to enable data-driven decision-making.
- Supported stakeholders with data-driven recommendations and performance insights for business decision-making and reporting.

Certificates

- **Intermediate SQL** — HackerRank.
- **Python Programming** — HackerRank.
- **Power BI for Beginners** — Simplilearn.
- **Lumenore**: Fundamental & BI Analytics, Lumenore Additional Feature, Lumenore Deep Dive.

Position of Responsibility

- Assisted team members in understanding SQL queries and dashboard logic.
- Collaborated with cross-functional teams to gather requirements and deliver analytics solutions.
- Prepare MIS Reports and Provide Data as per Business Needs.
